

Time Travel in Manisa

20th of January about 60 people went to 1533 in Manisa. The time travel which took place in Darussifa with the participation of university teachers and students. Manisa municipality supported it as well. Some foreign students attended it who were interested in Ottoman Empire period and history.

1533 Ottoman Empire is the period when the healthy mesir paste was created by Merkez Efendi for Hafsa Sultan who was seriously sick.

The old hospital Darussifa is the place where the first mesir paste made. According to the scenario; like every Friday, rice and chicken is made and given to people who came to Darussifa and people joined the activities belongs to the period.

All participants had a chance to learn about 1533 social and cultural life and they felt they were a part of it for a while. They could connect to the past and now on some points by key questions and they saw that even many years ago people could have similar worries and problems.

After the time travel we had positive reflections. It was an important step for time travel in Manisa. Because it was the first time travel under Celal Bayar University. It gives new opportunities for the bridging ages Turkey and the time travel future in Manisa.
